FAMI-QS POLICY

The Management of PRODOTTI ARCA S.r.l.

Institutes and implements this policy on quality and safety, in order to guarantee the supply of feed that is safe and produced according to the law, and to respect the requirements of the customer.

The responsibility to supply safe products is performed through the correct handling of all events that could represent a threat to the product's quality and safety, and through the prevention of potential frauds or terrorist activities.

To that end, the Company commits itself to respect the applicable laws, rules and regulations, and the Fami-qs (the European code of good practice) through the implementation and the continuous improvement of its certified operation system.

The Management involves the employees and all the parties concerned, especially its suppliers, to be fully aware of their contribution to the feed's safety and of the European legislation relevant to their functions and roles.

The planning of the operation system is defined from the evaluation of risks related to the Company's process, but also to the suppliers' production process, done through the monitoring and inspection of contractors, that must obey the regulations of HACCP (Hazard Analysis and Critical Control Point), TACCP (Threat Assessment and Analysis and Critical Control Points) and VACCP (Vulnerability Assessment and Analysis and Critical Control Points definition).

The Company, further to commits itself to respect the applicable rules and legislations relevant to additives pre-mix and feedstuffs, *is devoted to increase the eco-sustainability of its products and of the logistic solutions adopted in full respect of the environment.*

This document is notified to all the parties concerned, employees, suppliers and contractors involved in the production of feed additives. They are all requested to collaborate and conform their operations to the culture, spirit and principles here included.

The Management guarantees the necessary resources to fulfil this policy.

Dr Paolo Manzotti – Sole Director
